

# Laundering Cotton Dust Mops

*The following procedure for machine washing soiled cotton mops will assure maximum dusting and wearing results:*

1. Briskly shake out excessive dust in mop head.
2. Place head snugly in net washing bag or other perforated container. Infinity Twist® dust mops do not require a netted bag.
3. Soak mop for 10 minutes in hot soapy water.
4. Wash mop head 3-5 minutes in hot soapy or detergent water at low machine speed. **CAUTION:** Never machine wash mop head by itself - always wash in a full machine load. Over-washing or the use of bleach will cause severe damage to the yarn.
5. Rinse thoroughly in lukewarm water to remove alkali.
6. Remove head from washing bag and tumble in dryer not exceeding 180°F until dry. Excessive temperatures and drying times will cause rapid mop deterioration.

## *To Hand Wash...*

Just dunk mop head up and down in warm soapy water until dirt washes away; then rinse, gently, squeeze and hang dry.
